

QUALIFICATION REPORT

DHL FROZEN SOLUTION SMALL EXTENDED (-20°C)

Dry Ice Pellets

48Hr Delivery + SBS Summer & Static +30°C Ambient Test Profiles

Abstract

The following Qualification Report demonstrates how the system is conditioned, packed and performs when tested against the 48Hr Delivery + SBS Summer & Static +30°C ambient test profiles.

Performance Disclaimer

Test results shown in this document illustrate the performance of a Softbox Temperature Control Packaging System under precisely controlled packing and testing conditions in an environmental chamber. The temperature profiles used for testing are designed to simulate fluctuations in ambient temperature experienced during live shipping. However, as Softbox has no control for what may happen during a live shipment, it cannot be held responsible for any temperature excursions, resulting loss of product or compensation claim that may result from the failure of its systems to perform.

Summary

Testing of the DHL FROZEN SOLUTION SMALL EXTENDED proves that each shipper tested has met the acceptance criteria set out in this qualification document. It also confirms the solutions ability to operate in extreme ambient conditions and to provide qualified temperature control in excess of 120:00 hh:mm.

Test Profile	Product Load	Duration Achieved	Minimum Temperature : °C Maximum Temperature : °C
SBS Summer TO 6628	Full Load	139:55 hh:mm	Minimum Temperature : -77.1°C Maximum Temperature : +0.1°C
Static +30°C TO 6652	Full Load	80:45 hh:mm	Minimum Temperature : -78.3°C Maximum Temperature : +28.8°C

1. Introduction

The range of single use DHL FROZEN SOLUTIONS have been developed to reliably transport temperature sensitive product below -20°C for a minimum of 72:00 hh:mm.

2. Test Objective

To qualify the DHL FROZEN SOLUTION SMALL EXTENDED Single use Temperature Control Packaging System against the 48Hr Delivery + SBS Summer test profile when packed with a maximum product load. The additional static +30°C test was performed to establish the sublimation rates of the dry ice within the shipper.

3. Test Scope

2 x DHL FROZEN SOLUTION SMALL EXTENDED Single use Temperature Control Packaging Systems packed with a maximum product load were prepared in ambient conditions.

All testing was carried out using new shippers and calibrated temperature logging equipment and environmental chambers.

Once packed the DHL FROZEN SOLUTION SMALL EXTENDED Single use Temperature Control Packaging System was placed into a calibrated temperature controlled environmental chamber which was preprogrammed with the stated test profiles.

Test product temperatures were recorded during the test with readings being taken at 5 minute intervals. The tests were run for a minimum of 120:00 hh:mm.

4. Test Acceptance Criteria

Maximum product load temperatures within the DHL FROZEN SOLUTION SMALL EXTENDED Single use Temperature Control Packaging System are to be maintained below -20°C for a minimum of 120:00 hh:mm when exposed to the 48Hr Delivery + SBS Summer test profile. The acceptance criteria includes the 48Hr period of the delivery profile. There is no acceptance criteria for the static +30°C Profile test.

5. Test Method

5.1. Test Equipment

Equipment Description	Equipment Serial Numbers
Environmental Chamber	16956 (6)
Eurotherm 6180A Datalogger	PL1231000032-3112-PL3

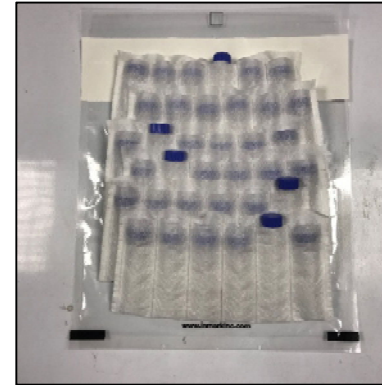

5.2. Test Materials

The shipper when tested contained the following Product Load.

Product	Product Name	Water Filled Vials
	Temperature Range	<-20°C
	Primary Packaging	Plastic Vials
	Primary Packaging Weight	14g
	Dose	10ml
	Vial Dimensions (mm)	13 x 13 x 93
	Product Orientation	Horizontal
Product Load	Full Load Quantity	36 Water Filled Vials
	Full Load Dimensions (mm)	180 x 145 x 150

5.3. Product Load Images

5.3.1. Image of Maxium Product Load

5.4. Temperature Probe Locations

The product load was probed using calibrated Eurotherm data logger PT100 probes as below.

5.4.1 Maximum Load

3 probes were placed within the water filled vials as per fig 1.

1 probe was placed within the Environmental Chamber to measure the ambient temperature for the duration of the test.

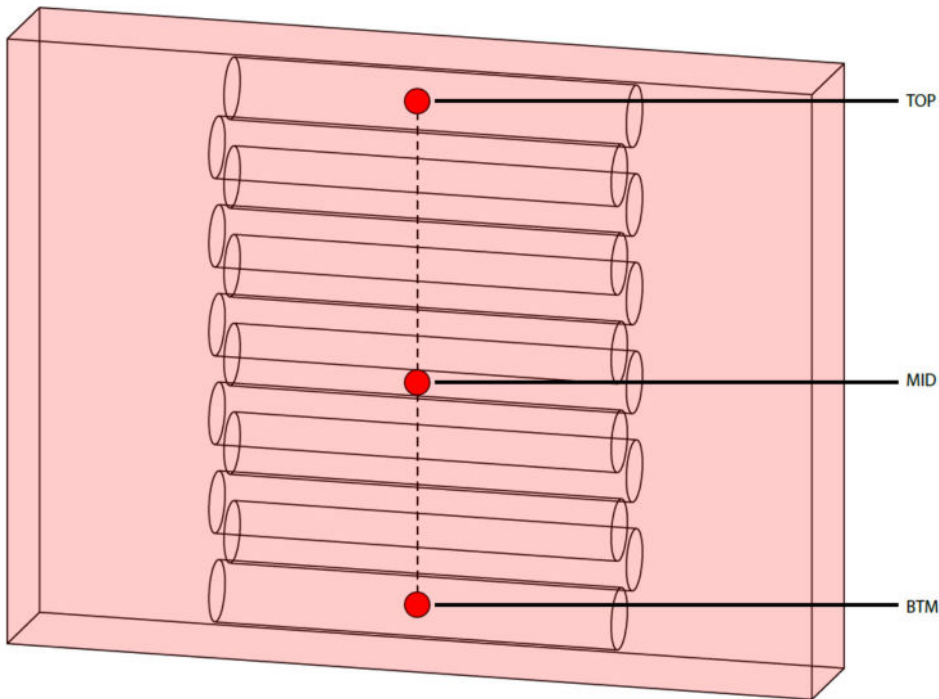

Fig 1

5.4.2 Data Logger / Probe Tracking

Probe Position	Datalogger Probe No.
Ambient	6180A probe 12

Full Load	Datalogger Probe No.
Top	6180A probe 20
Mid	6180A probe 21
Btm	6180A probe 22

5.5. Ambient Test Profiles

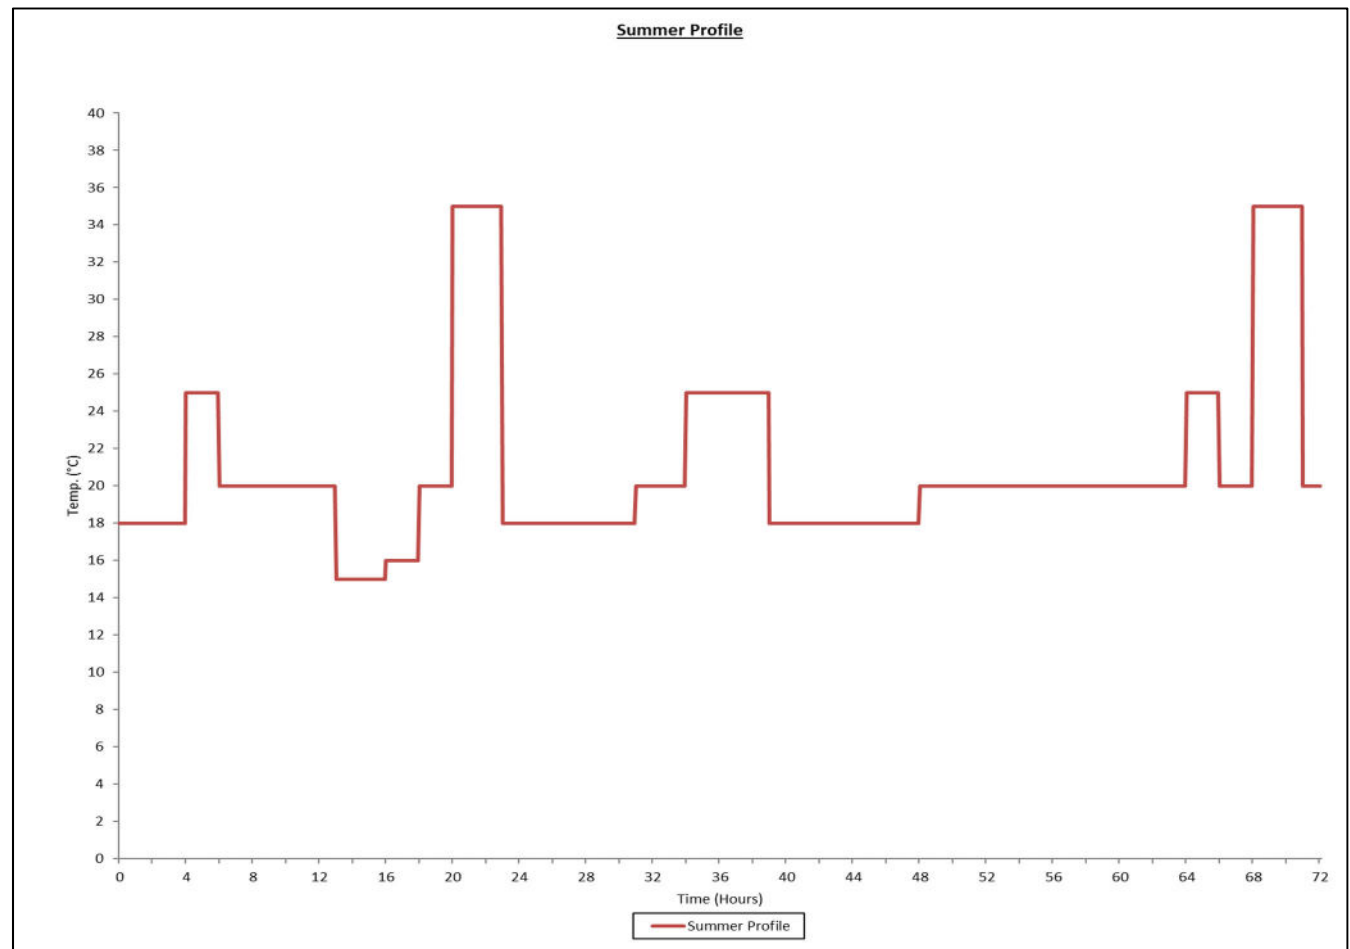

5.5.1. 48 Hour Summer (Delivery)

Elapsed Time	Segment Duration	Segment Temperature (°C)
4	4	18
6	2	25
13	7	20
16	3	15
18	2	16
20	2	20
23	3	35
24	1	18
40	16	20
42	2	25
44	2	20
47	3	35
48	1	20

5.5.2. SBS Summer

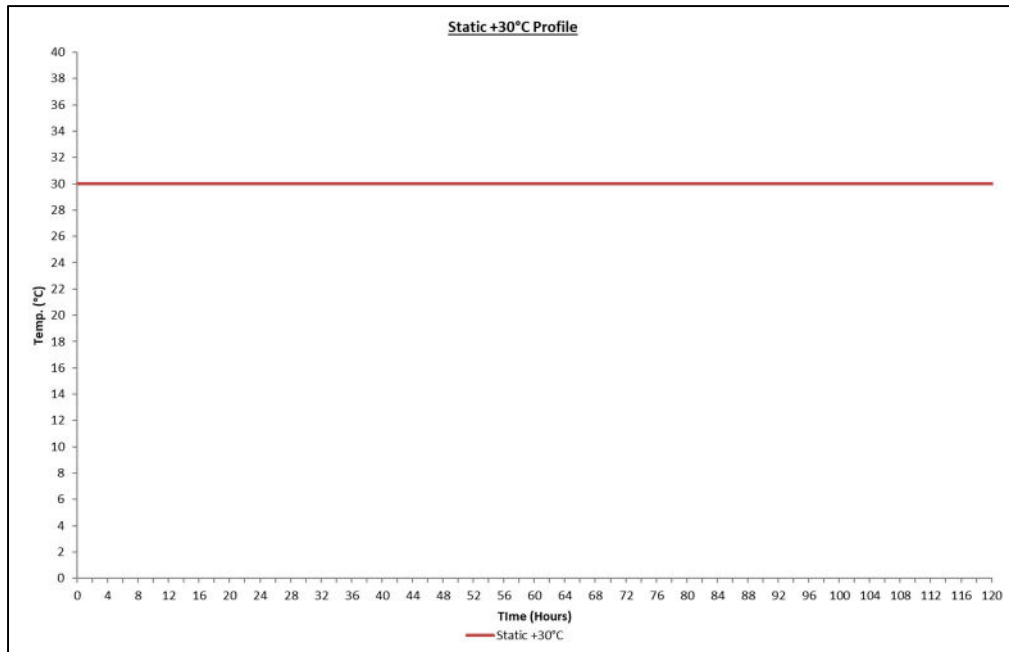

Elapsed Time	Segment Duration	Segment Temperature (°C)
4	4	18
6	2	25
13	7	20
16	3	15
18	2	16
20	2	20
23	3	35
31	8	18
34	3	20
37	3	25
39	2	25
48	9	18
64	16	20
66	2	25
68	2	20
71	3	35
72	1	20

Note : For systems with expected durations beyond 72 Hours, the above 72 Hour Profile is repeated in cycle. The justification for this cycling is based upon the fact that the levels and durations of temperatures experienced on such a transit network will continue to be similar regardless of the length of the transit period.

5.5.3. Static +30°C

Elapsed Time	Segment Duration	Segment Temperature (°C)
120	120	+30°C

6. Test Procedure

6.1. Dry Ice Quantity

8.598kg of 16mm dry ice pellets; approximate pellet weight – 15g, on packing for delivery, 5.058kg of 16mm dry ice pellets were left on re-packing with product load.

6.2. Test Product Conditioning

The maximum product load was placed into dry ice prior to the test starting to allow it to stabilise.

6.3. Test Initiation

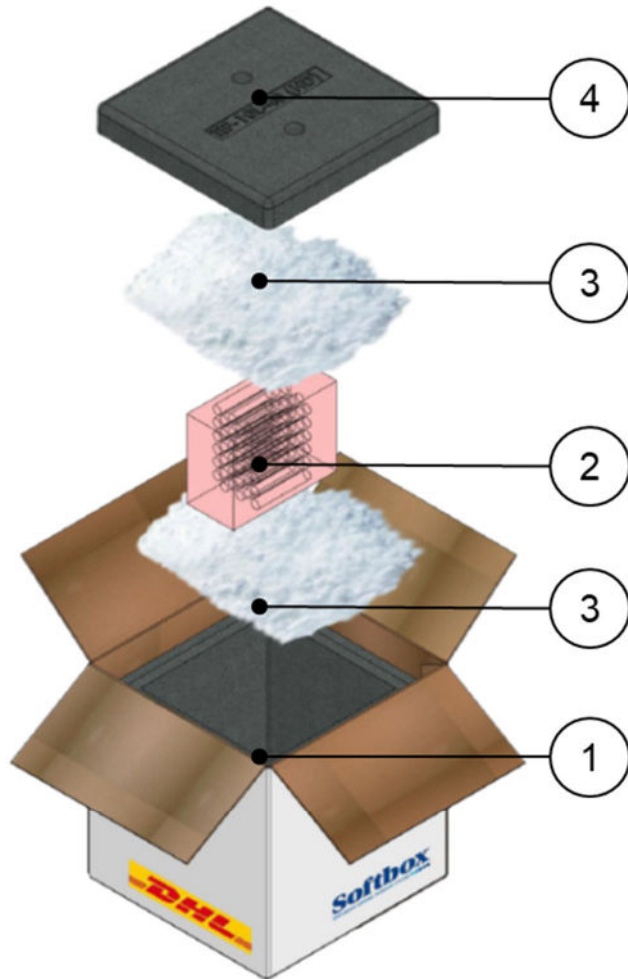

The Environmental Chamber was set to the start temperature of the ambient test profile as described in section 5.5.

Each DHL FROZEN SOLUTION SMALL EXTENDED Single use Temperature Control Packaging System was packed within an ambient environment with a set point of +20°C (±2°C) according to the System Diagram (Section 6.4) and Packing Instructions (Section 6.5).

Each packed DHL FROZEN SOLUTION SMALL EXTENDED Single use Temperature Control Packaging System was then placed into the Environmental Chamber. The test profile was then set to run.

6.4. Packing Diagram / System Specification

SYSTEM DIAGRAM

SYSTEM SPECIFICATION

Item	Components	Quantity	Weights and Dimensions	
1	DHL Frozen Solution Small Extended Base	1	Tare Weight	9.8kg
			Volumetric Weight	6kg
2	Test Product Load	1	Product Dimensions L x W x H	180x145x150mm
3	Dry Ice Pellets	8.598kg	Shipper Dimensions L x W x H	310x310x320mm
4	DHL Frozen Solution Small Extended Lid	1		

Freezing Media

8.598kg of 16mm dry ice pellets; approximate pellet weight – 15g, on packing for delivery, 5.058kg of 16mm dry ice pellets were left on re-packing with product load.

6.5. Packing Instruction

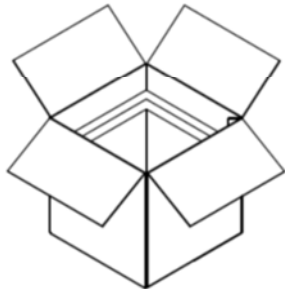

Fig.1
Remove the Frozen Solution lid and prepare to pack.

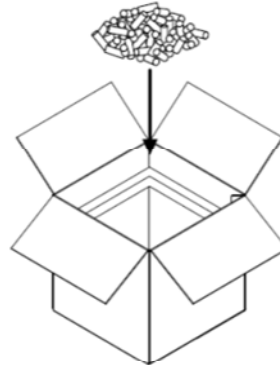

Fig.2
Place a minimum 2 pellet layer of dry ice in the base of the Frozen Solution.

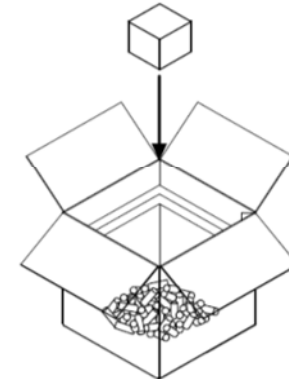

Fig.3
Place product load on the layer of dry ice pellets.

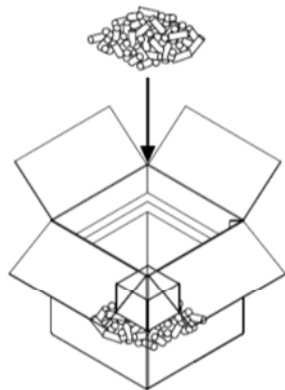

Fig.4
Place dry ice pellets around the product load.

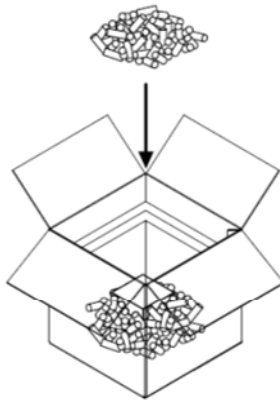

Fig.5
Place the remaining dry ice on the product load.

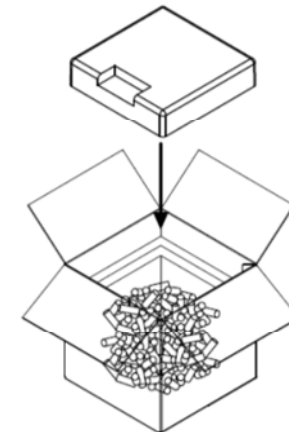

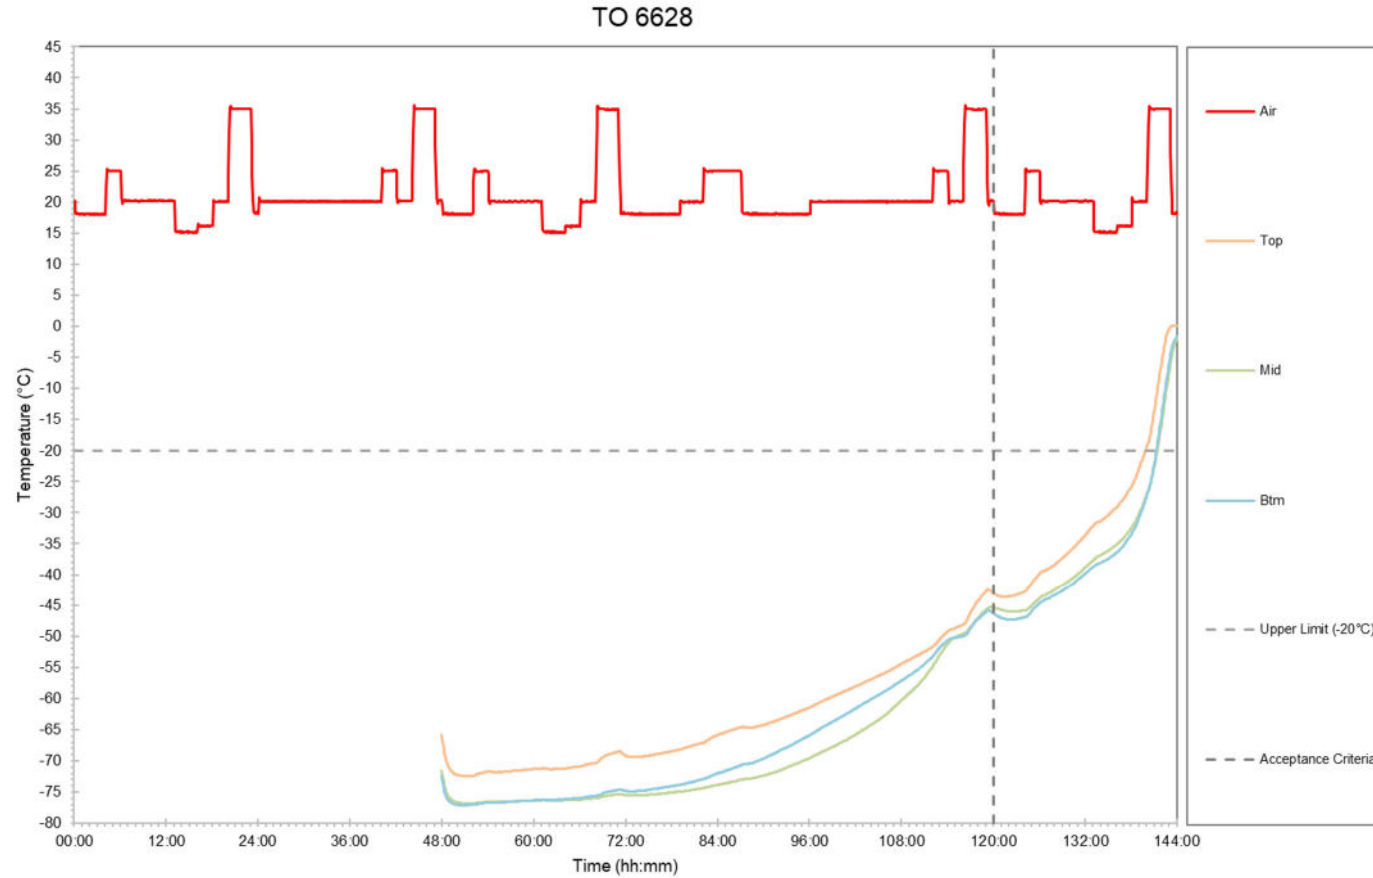

Fig.6
Place the lid on the Frozen Solution and secure outer carton with tape.

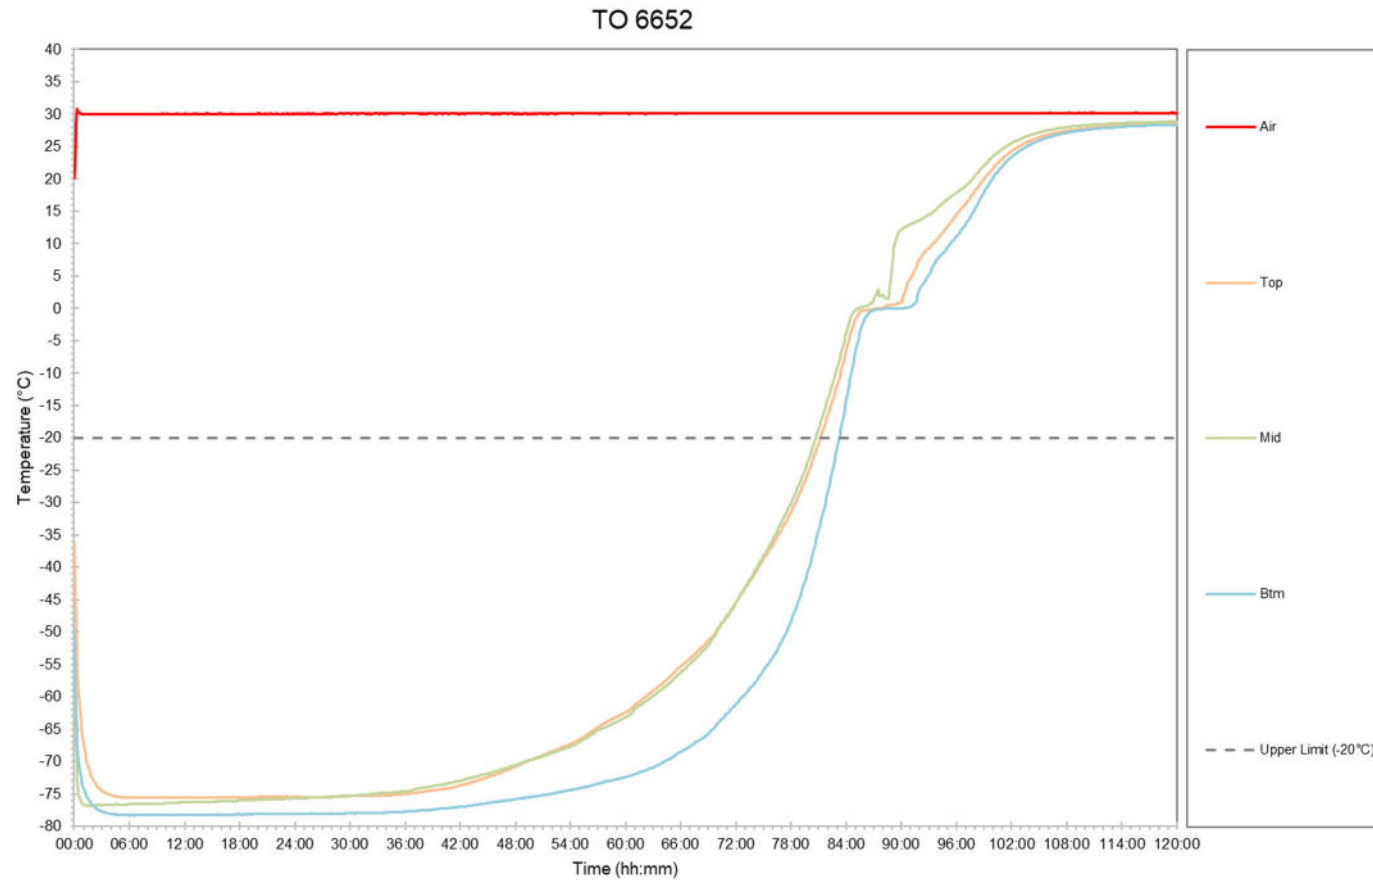

7. Test Results

7.1. TO 6628 – SBS Summer

	Temperature / Time	Probe Location
Product Load Temp <-20°C	-19.8°C / 139:55 hh:mm	Top
Maximum Temperature / Elapsed Test Time	+0.1°C / 143:20 hh:mm	Top
Minimum Temperature / Elapsed Test Time	-77.1°C / 50:10 hh:mm	Btm

7.2. TO 6652 – Static +30°C

	Temperature / Time	Probe Location
Product Load Temp <-20°C	-19.7°C / 80:45 hh:mm	Mid
Maximum Temperature / Elapsed Test Time	+28.8°C / 117:05 hh:mm	Mid
Minimum Temperature / Elapsed Test Time	-78.3°C / 05:35 hh:mm	Btm
Sublimation Rate	0.107kg/Hr	

8. Deviations and observations

8.1. Deviations

No deviations were recorded during this testing.

8.2. Observations

The DHL FROZEN SOLUTION SMALL EXTENDED exceeded the 120:00 hh:mm acceptance criteria when tested against the 48Hr Delivery + SBS Summer Profile. When tested against the Static +30°C profile the temperature of the maximum product load remained below -20°C for 80:45 hh:mm. This demonstrates a dry ice sublimation rate of 0.107kg/Hr at +30°C.

9. Conclusion

Testing of DHL FROZEN SOLUTION SMALL EXTENDED Single use Temperature Control Packaging System proves that each shipper tested with a maximum product load has met the acceptance criteria set out in this Qualification Report.

This is to certify that the whole of the supplies detailed hereon have been inspected, calibrated and tested using test equipment which has been calibrated by a UKAS accredited laboratory.
Tempcon test equipment: **T1085**

- Copies of the test instrumentation UKAS certificates are available upon request.
- The above measured values apply to the measurement and are not intended to indicate the specification, or repeatability of the instrument.
- The International Temperature Scale of 1990, is used for temperature measurement.
- Uncertainties are for a confidence probability of not less than 95%.
- Laboratory parameters at time of calibration: 20.1°C, 58%RH
